Arts Attack Testimonials

Teachers and Students really LOVE our curriculum !

The San Diego Unified School District has been using the Arts Attack curriculum for years

"and deems it to be one of the best formats for teaching standards-based visual art to students. The materials are grade-appropriate, user-friendly, and aligned with standards. The kits include rigorous and engaging curriculum, detailed lesson plans with illustrations, videos and reproductions of master works of art, lessons for learning more about the artists, and embedded assessments. Students, teachers and parents are thrilled at the quality of work that the students produce through this method. It can be taught by teachers with little or no background in the arts, and it produces a big bang for the buck for districts who are finding it difficult to fund quality arts instruction in their schools.""

Karen Childress-Evans, EDD
Director, Visual and Performing Arts, San Diego Unified School District

Arts Attack-best program I've seen in 30 years

"I have never seen an art program which is as well conceived, as well received by students, as effective in getting students to understand the elements of texture, color, composition, line, balance, and all the others."

Dr. William D. Grafft
Superintendent, Mountain View School. District.

Best thing that has happened in fine arts

"The Arts Attack program is the best thing that has happened to the fine arts curriculum at St. Therese School. The students love it because they feel like artists, the classroom teachers love it because it empowers them to teach real art, and the parents are quite impressed with the quality of work that the students are creating! A real tribute is that "art" has replaced "lunch" as the favorite activity of the day."

Sister Mary Ellen Strunk
Principal, St. Therese School, Southgate, KY

Aligned to National Standards for Visual Arts

"Initially, when our curriculum committee reviewed the detailed Scope and Sequence of Arts Attack, we were pleased to find it aligned to National Standards for Visual Arts Education Teachers are finding the instruction sequential, appropriate for grade levels and teacher friendly in its organization. I met with one of our teachers who was trained in arts education and it was her opinion that Arts Attack was one of the top art programs she has seen for the elementary grades. Knowing that a program of this quality does not create itself, we thank you for having the vision to provide teachers with the Arts Attack curriculum"

Patti Revolinski
Associate Director of Ed

It's amazing to watch their confidence improve

"It's amazing to watch kids who have no confidence in their artistic ability follow along with the videos and absolutely shine with glee when they realize that they can draw or paint and create their own artwork. This program has turned my naysayers into artists. I no longer hear "I can't draw". I now hear: "Can you rewind that?", "Can I see it again?", and "Do you like my artwork?". ARTS ATTACK is a wonderful confidence booster, and the step-by -step videos work perfectly for our elementary kids. "

Erin Wallace
After School Programs, Riverside, CA

I have seen the artwork and it is beautiful

"I've heard so many glowing reports from our facilitators in the After School Program about the ease of the lessons and how much the students enjoy them. What has been really great to see is how our middle schools have started a monthly art contest using the techniques they have learned through ARTS ATTACK!"

Shelly Clifton
After School Programs, Alvord USD, CA
