

What: Systematic Synthetic Phonics online program

Ages: 5 to 10

Includes: A phonics placement test, 400+ activities, decodable books and printable teaching resources

Who: For emergent readers and students with gaps in their core reading and spelling knowledge

FAST PHONICS

Fast Phonics is the complete online systematic synthetic phonics program that's both rigorous and exciting! You get access to an engaging online program plus teaching resources such as lesson plans, flash cards, support videos, slides, printable phonics books and handwriting sheets.

Hundreds of interactive activities

Fast Phonics is broken into 20 fun-filled levels known as Peaks, covering a set of letter sounds that are aligned to phonics phases. Each Peak has up to 24 parts and focuses on a specific set of letters and sounds, concluding with a quiz.

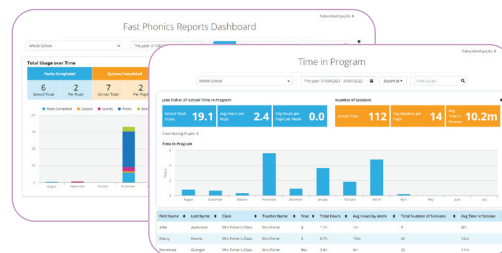

Decodable books

Each Peak also includes 1 to 4 beautifully illustrated decodable books, with an accompanying book quiz at the end. The books and quizzes allow your students to apply their skills to read and comprehend the text.

Reporting

Head over to the Teacher Dashboard, where each of your students' results are analyzed and reported. Students can also check their results in their personal My Progress area, so they can track and see their improvements.

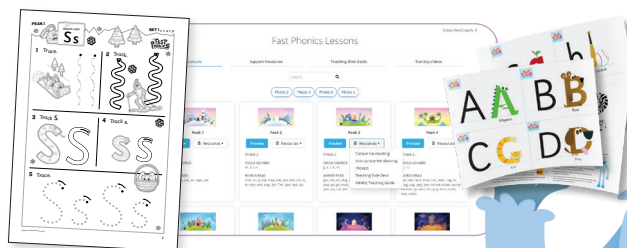

Animated videos

Need to introduce a letter, specific phoneme, digraph, trigraph or split digraph? Fast Phonics uses short and well-paced animated videos to explain reading concepts to help young students learn better.

Printable resources

Get access to an extensive bank of reading and writing printable resources such as teacher guides, worksheets, handwriting pages and more!

Motivational rewards

Fast Phonics keeps your students engaged through fun and games! Watch them meet playful characters such as Yeti and the Furballs, earn Yeti coins, gems, and watch reward animations.
