My kids are in love with The Foos! I have been working on the site this week with Kindergartners and First Graders. Thanks for creating such an engaging way to teach coding!

Benefits of teaching code with codeSpark

Aligns to standards in Math, Science, and Computer Science.

Based on curriculum developed at MIT and UCLA.

Completely word-free, perfect for pre-readers.

New content added monthly.

More than “move the robot”. Kids apply coding skills to make games.

codeSpark is proven effective

After 90 minutes of coding with codeSpark Academy

22%

showed an increase in accuracy with moderate sequencing tasks

55%

showed an increase confidence in problem-solving abilities

FREQUENTLY ASKED QUESTIONS

How much is codeSpark Academy?

codeSpark Academy is 100% FREE for verified teachers, librarians and non-profit organizations.

Is codeSpark Academy free for Homeschool use?

Homeschooling parents will have to pay for a subscription to codeSpark at a discounted rate. Please contact us at info@codespark.com for more information.

Does codeSpark Academy's curriculum align to standards?

Yes - codeSpark Academy aligns to Math, Science, and Computer Science standards.

Is there a limit to how many students or classrooms I can create in the teacher dashboard?

No, you can create unlimited classrooms and students.

I accidently signed up for a Parent account. How can I sign up for the teacher dashboard?

Contact us at info@codespark.com and we'll be able to help transfer your account.

Can my students play at home using their school account?

Unfortunately, no. Teacher accounts are not transferable to at-home use.
