Thanks to Prowise Presenter 10, lessons and presentations can be created quickly, easily and interactively. Presenter is bursting with educational content and interactive options for teachers (instruction), groups (collaborative learning) and students (processing). For both primary and secondary education. Consider, for example: images, videos, tools, Touch Table tools and 3D models, but also ready-made curriculum strands, quizzes and mind maps.

**The entire Prowise Presenter version is free for all users.**

Presenter 10 beta

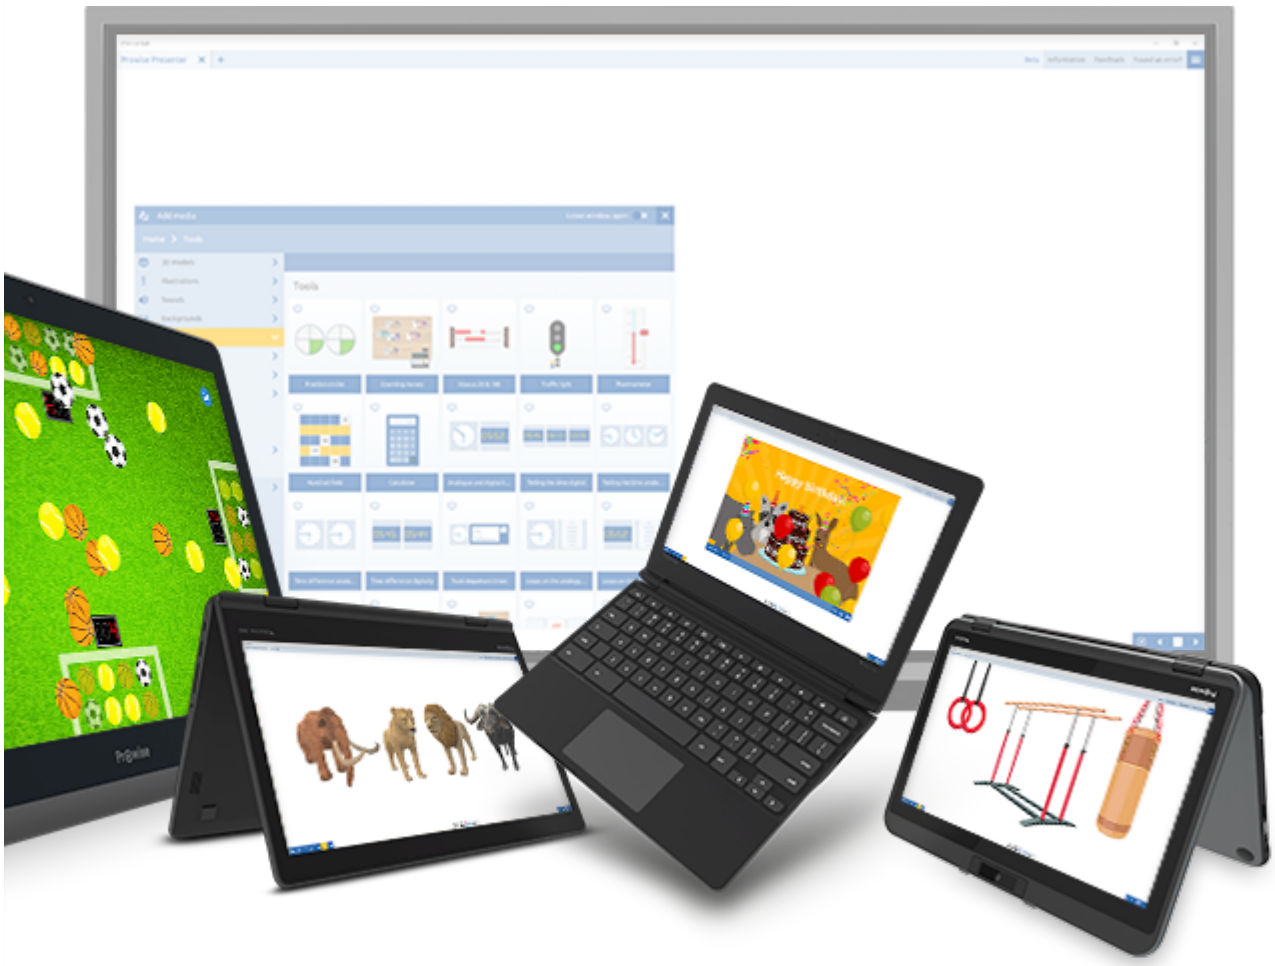
## We continue to improve Presenter together with you

The incredible upgrade from Presenter 9 to Presenter 10 is based on the feedback we have received from the educational sector. This way we can align Presenter with the wishes of the teachers and students even better.

From now you can try our latest educative software! We are still very busy developing Prowise Presenter 10, but are happy to give you a taste of what we are working on. For instance, you can be the first to discover

the latest 3D models.

MORE ABOUT PRESENTER 10 BETA



Presenter for everyone

## Always deployable anywhere

Our Prowise Presenter software offers many possibilities for both teacher and student: create lessons or essays, work with innovative tools and create interactivity in the classroom in a separate environment for

primary, (vocational) secondary and higher education.

Presenter has been optimised for our touchscreens and personal devices, but you can also use it on other devices.

Educational riches

## Enrich your lessons

You can find incredible elements in the Prowise Presenter media library to create or enrich your lesson.

- Images
- Illustrations and symbols
- Backgrounds
- Videos
- Sounds

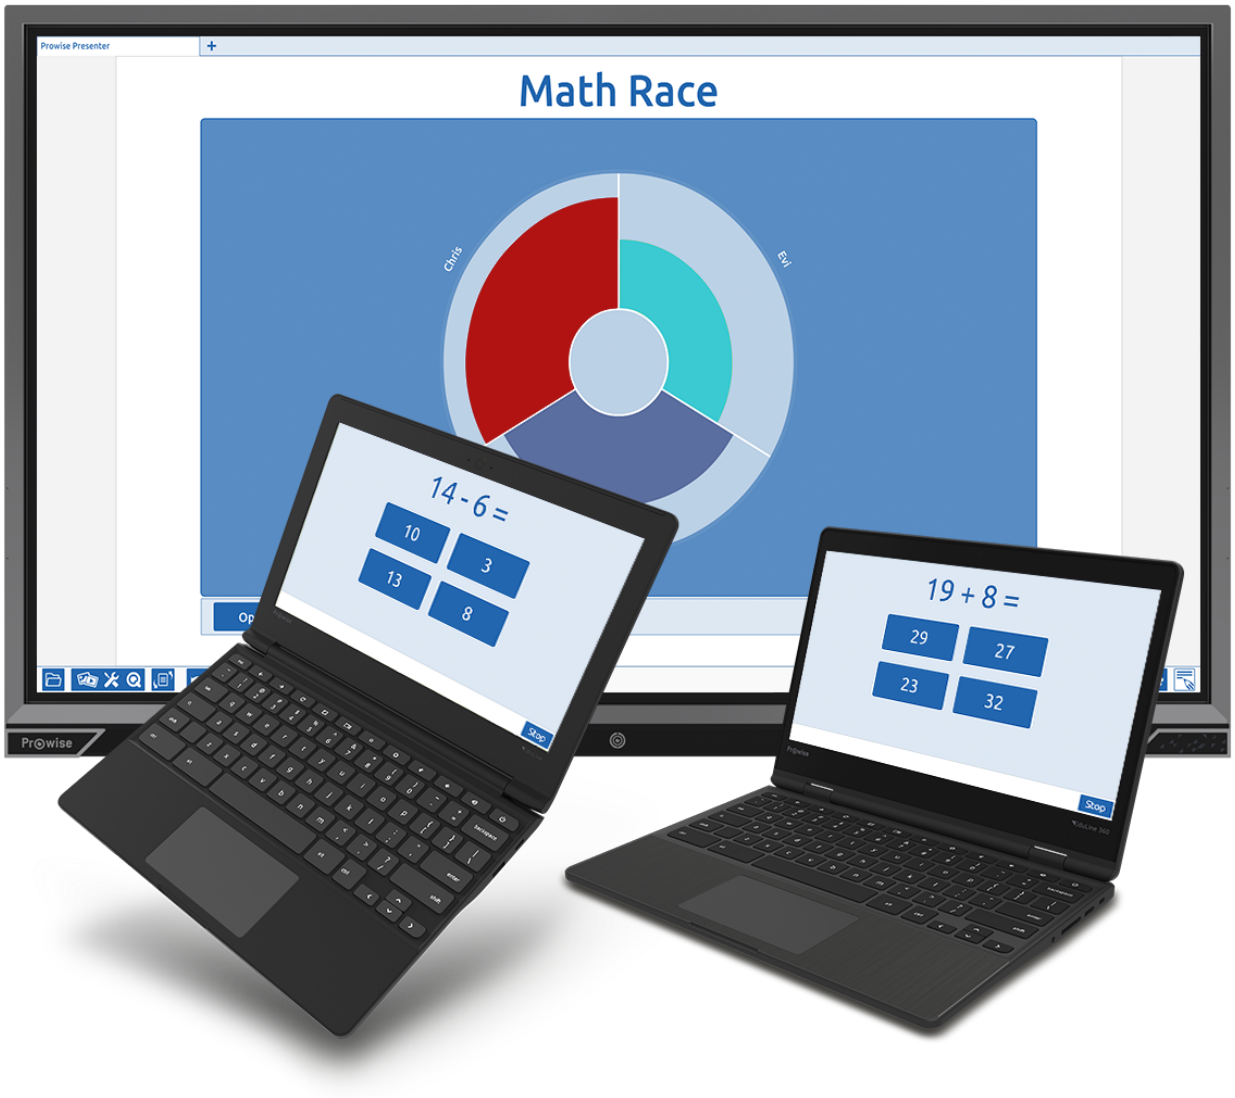
Tools & 3D tools

## Interactive learning

The huge collection of tools, specially developed for all ages and disciplines, offers a world of instruction and practise material for your lesson.

Directly integrate the ready-made tools or adjust them to suit the level of your class.

A number of tools deserves special attention: Touch Table tools, ProConnect, ProQuiz and CodeWise.



ProConnect

# Interaction in the classroom

With ProConnect, you can link tablets, smartphones and other devices live with the Prowise Touchscreen.

- Share screens between device and touchscreen
- Monitor your students' work live

- Take a vote among all students in class
- Collect student input
- Challenge each other in educational games

**DISCOVER ALL THE BENEFITS OF PROCONNECT**

Touch Table tools

## Make learning fun

Touch table tools combine learning, fun and collaboration by means of educational games.

In a playful way, students can get started with several Touch Table tools to, for instance, improve their numeracy.

The Presenter Touch Table tools work optimally with the combination of the Prowise Touchscreen and the iPro Tilt or Toddler lift.

CodeWise

## Programming, you can learn it too

Does programming sound like a faraway and abstract concept? Not at all!

The CodeWise programming tool and the CodeWise card game make programming accessible for anyone.

Not only incredibly educational, but most of all super fun.

LEARN MORE ABOUT CODEWISE

ProQuiz

## Create a quiz at any desired level

With ProQuiz, you can create a knowledge test for any desired level.

It has been developed such, that the tests or quizzes can be taken in class collectively and individually.

Community

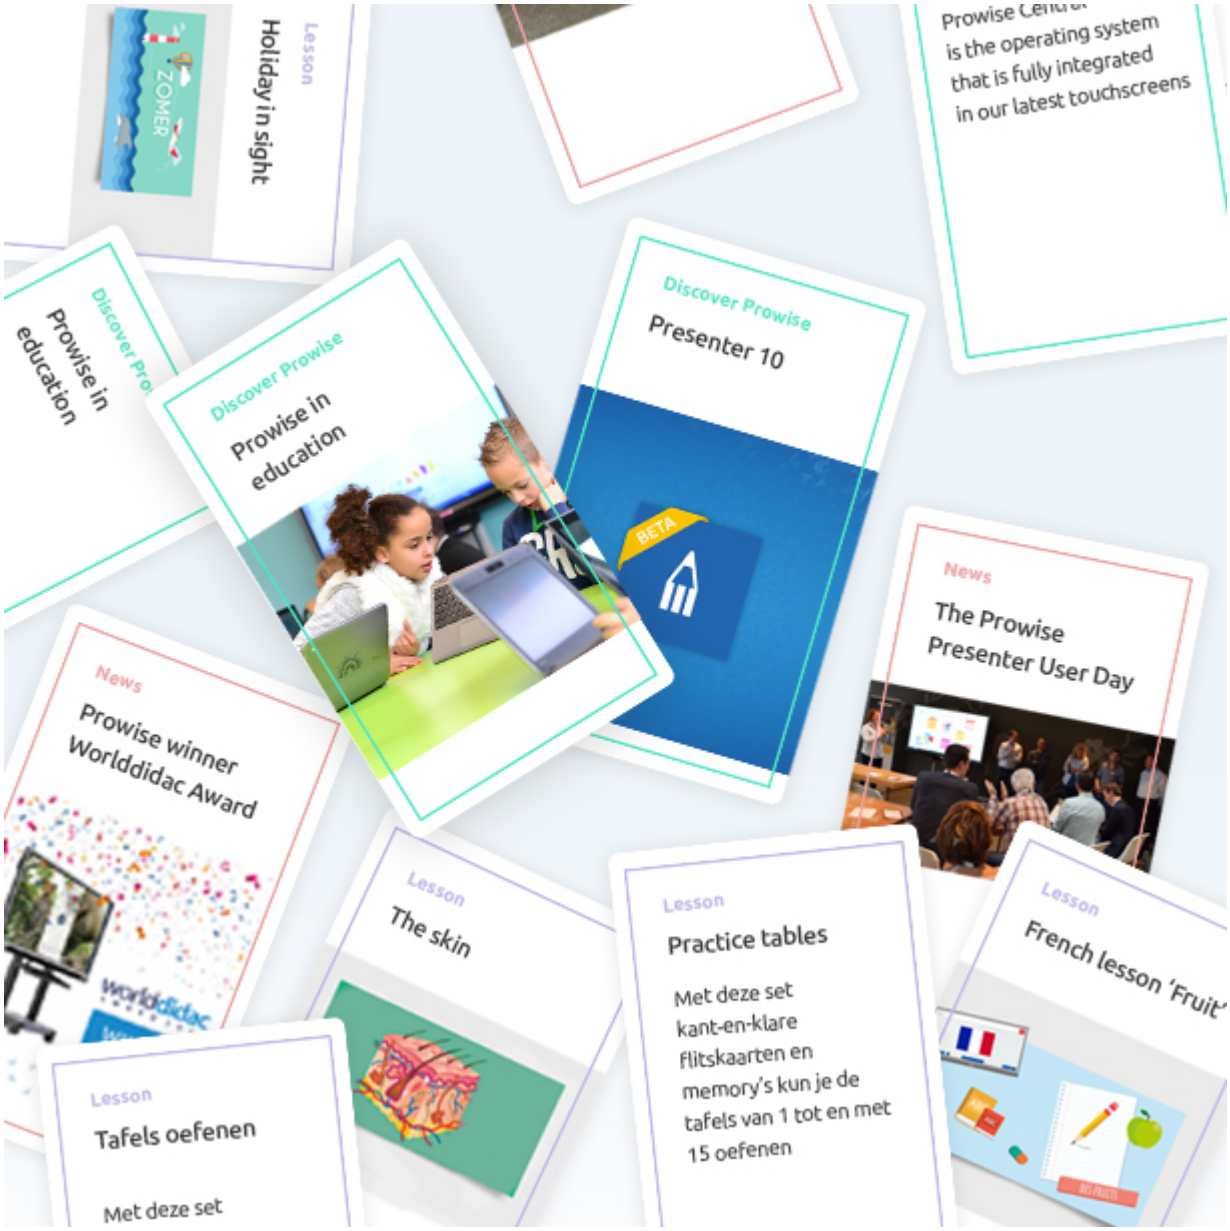
# Share lessons among colleagues

In Presenter you can share your lessons at school, managerial or national level. This way, you can use your fellow teachers' lessons for inspiration.

Prowise also regularly posts ready-made lessons and entire curriculum strands to the community.

These are often linked to a current theme, such as spring, Children's Book Week, the Dutch tradition of "Prinsjesdag" (Prince's Day) or the start of the school year.

You can directly use these lessons, or tailor them to the needs of your own students.



Discover and learn

# Everything about Presenter

You can quickly and easily learn how to use Presenter in the classroom in the Discover and Learn environment.

Clear and straightforward videos explain how Presenter works.

You will also find information on (implementation) trainings, useful tips from colleagues and the latest news.

Up to date in one snap!

## Take screenshots

Looking for an easy way to take a screenshot and add it to your lesson directly? With Presenter Annotate, you can! Integrating current events in your lessons is now becoming incredibly easy!

Annotate is an integrated functionality of Prowise Presenter in the Presenter app for Windows tablet, PC and touchscreen. Easy as that!

Download the app for Mac or Windows.

Importing and exporting files

## Getting started flexibly

Have you prepared a lot of lessons in PowerPoint? No problem!

With Prowise Presenter's import function, you can import different file formats into your new Presenter presentation in no time and enrich them with all the options Prowise Presenter has to offer.

Besides importing, you can also export Presenter files to PDF or IWB.
