## Class 1A

|            |  |     |     |   |    |    |    |   |    |    |  |  |   |  |
|------------|--|-----|-----|---|----|----|----|---|----|----|--|--|---|--|
| Anna A     |  | 12  | 100 | ● |    |    |    |   |    |    |  |  |   |  |
| Boris B    |  | 93  | ●   | ● | ●  |    | 54 | ● |    | 96 |  |  |   |  |
| Cornelia C |  | 100 | 100 |   |    |    | ●  | ● | 58 | ●  |  |  |   |  |
| David D    |  | ●   | 25  | ● | 52 | 37 |    | ● |    |    |  |  |   |  |
| Emma E     |  | 12  | 10  | ● | ●  | ●  |    | ● | ●  |    |  |  | ● |  |

## The Notysing Dashboard

In the Notysing Dashboard, you can add your students to groups and track their progress in the app.

Not only can you see what lessons have been completed by the student, you can also see the percentage score of each lesson. This is great for following up on homework, assigning extra practice in the different topics and can help with assessment.

The lesson score takes into account both the number of retries needed to complete each exercise, as well as the accuracy of the pitch of each note sung.

LAUNCH THE DASHBOARD

# Get into the dashboard

## Create an account or login

If you are new to Notysing, launch the dashboard and create an account.

If you have used the app and created a profile in the app, use the same method to log in to the dashboard, with your email or Google Login.

*Note that using Google Login and using Email Login with the the google email does not log you in to the same Notysing account. Make sure to use the same login method every time.*

## Create a group

Create a group with the + button in the sidebar. A group can include all your students, just one class or a smaller group.

## Import students

### Import students from Google Classroom

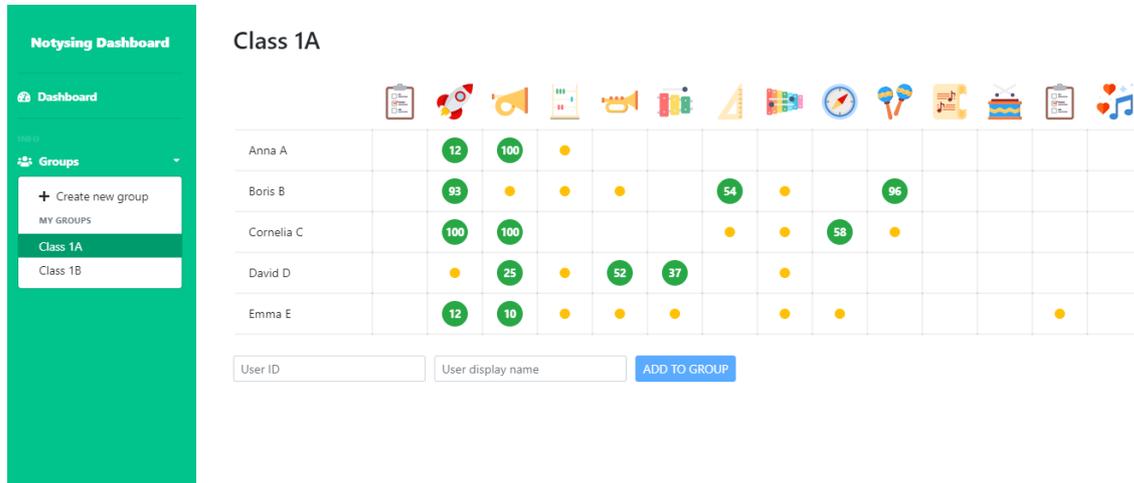

If you are using Google Classroom to manage your classes, you can automatically import your students into dashboard groups.

1. Click the "Import Users" button on the home page of the Dashboard
2. Choose "Google Classroom" and click next to authorize the import
3. Select the Classroom you want to import users from
4. Select or create a new Dashboard group to import the students into
5. Choose what students from the Classroom you want to import and click "Import"

The students are now added to the group.

**The students need to login to the Notysing App with the Google Login button** using the same Google account connected to the Google Classroom, and their progress will show up in the progress table. *This does not work if they use their google email in the email login.*

Reload the page to see updated progress.

The screenshot shows the Notysing Dashboard interface. On the left is a green sidebar with a 'Dashboard' section and a 'Groups' dropdown menu containing 'Class 1A' and 'Class 1B'. The main area is titled 'Class 1A' and features a progress table with 10 columns of icons and 5 rows of student names. The table contains numerical scores in green circles and yellow dots. Below the table are input fields for 'User ID' and 'User display name', and an 'ADD TO GROUP' button.

| Student    | Icon 1 | Icon 2 | Icon 3 | Icon 4 | Icon 5 | Icon 6 | Icon 7 | Icon 8 | Icon 9 | Icon 10 |
|------------|--------|--------|--------|--------|--------|--------|--------|--------|--------|---------|
| Anna A     | 12     | 100    | .      |        |        |        |        |        |        |         |
| Boris B    | 93     | .      | .      | .      |        | 54     | .      |        | 96     |         |
| Cornelia C | 100    | 100    |        |        |        | .      | .      | 58     | .      |         |
| David D    | .      | 25     | .      | 52     | 37     |        | .      |        |        |         |
| Emma E     | 12     | 10     | .      | .      | .      |        | .      | .      |        | .       |

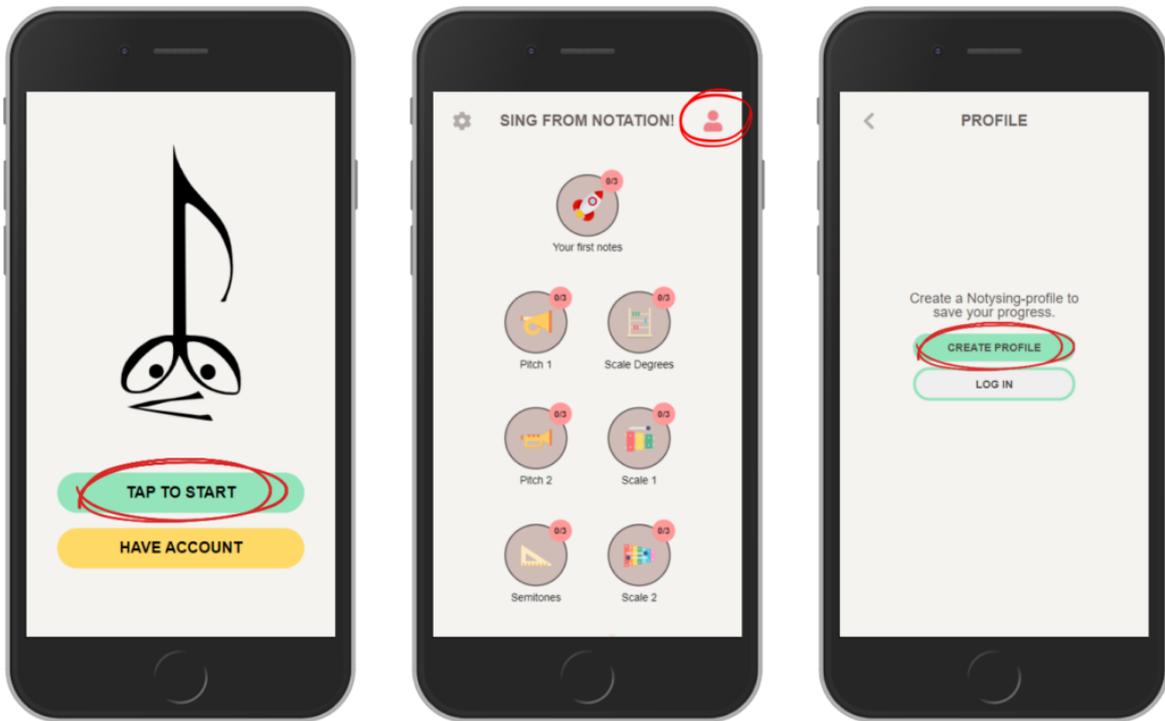

## Manually adding students

### Manually add students by Email

You can manually add students to groups using student's **email address**.

Ask your students to:

- Open the app
- Click the user icon on the main page and create an account using email.

In the Dashboard:

- Type the email address in the “Email or User ID” field in the group
- Type a display name for the student
- Click “Add to group”

The user is now added to the group and the progress shows up in the progress table. *Note that the student need to create the account before you add them, or you will get an error.*

Reload the page to see updated progress.

| Emma E     | 12  | 10  |  |    |    |  |  |    |  |  |  |

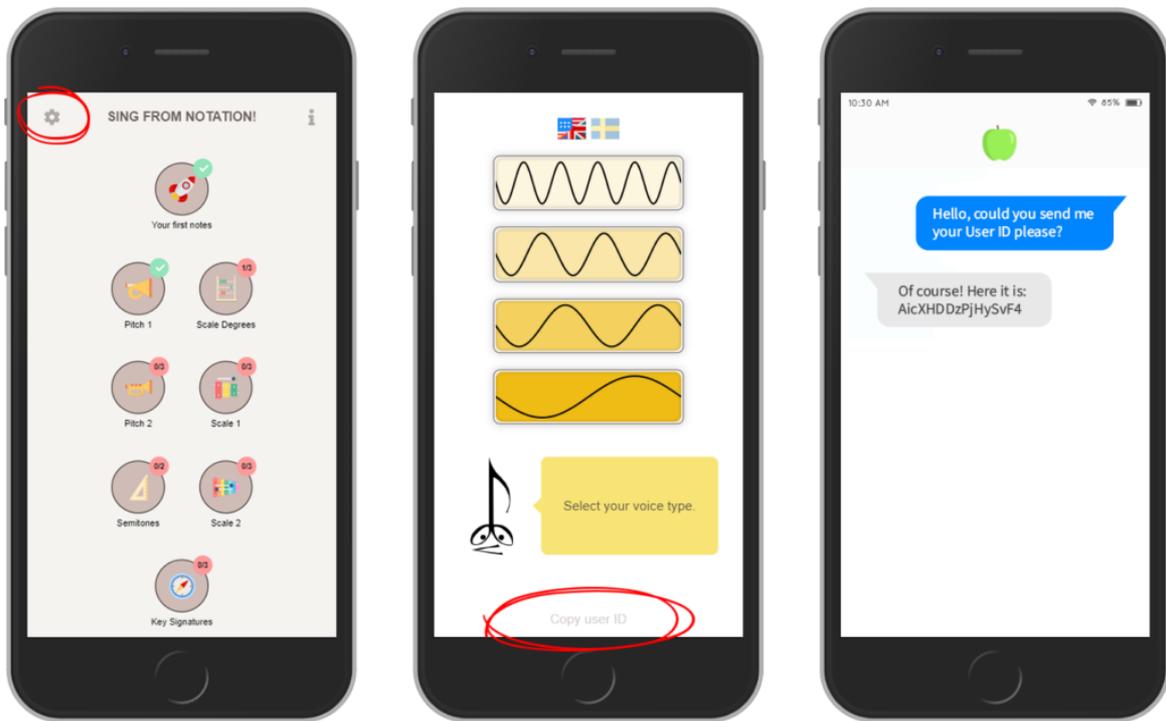

## Manually add students by User ID

You can manually add students to groups using student's **User ID**.  
The User ID is found in the app.

Ask your students to:

- Open the app
- Create an account using any method.
- Click on the cog icon on the main page to go to the Settings page
- Click the button at the bottom of the settings page to copy the ID
- Paste the ID in a message to you

Use your normal channels to get the message, such as email, SMS, Messenger, or whatever makes sense for your school situation.

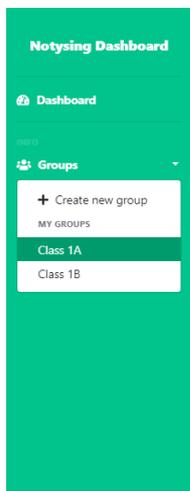

In the Dashboard:

- Paste the User ID in the "Email or User ID" field in the group
- Type a display name for the student
- Click "Add to group"

The user is now added to the group and the progress shows up in the progress table.

Reload the page to see updated progress.
