iknowit lessons are aligned with the Common Core standards.
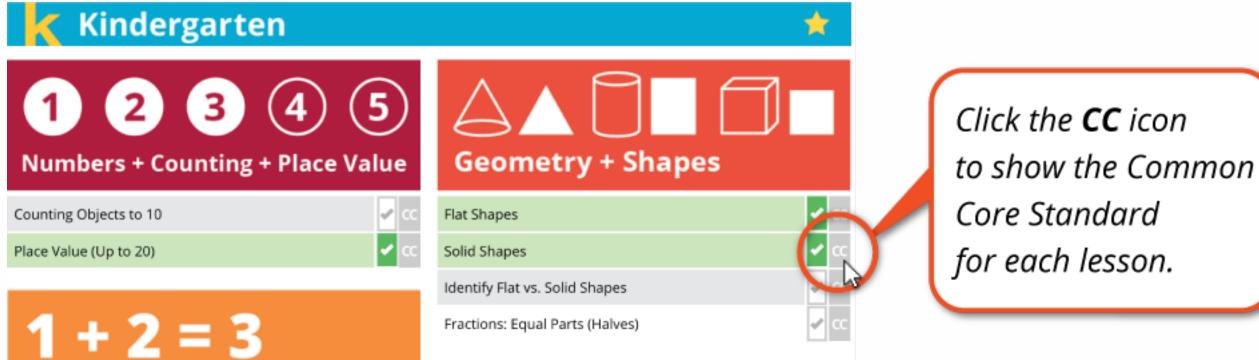

We want to ensure that teachers and school administrators are able to access supplemental math resources that are closely aligned with your needs. We've reviewed all of our online math lessons, and note correltations and alignment, when applicable.

Here's how to view the Common Core standards alignment:
When you log into I Know It, select a grade level from the menu bar located at the top of this page.

To the right of each lesson title is a CC icon. Click it to see the standard(s) that correlate.

In the account settings page, you can toggle between Common Core, Florida Standards, and Texas Standards.

Thank you for using iknowit at your school!
