

Experience the Difference with eDynamic Learning

As a teacher-founded company, **education is in our DNA**. We strive to provide the best possible curriculum for teaching and learning, matched with our timely and superior customer support. We offer schools a wide variety of career-focused courses that allow students to discover new and exciting career fields, and tie their passions to a rewarding profession.

eDynamic Learning is the **largest provider of electives and CTE courseware** in North America, with a catalog of 200 courses and growing for middle and high schools.

Our courses offer **many interactive features** like videos, slideshows, podcasts, and flashcards to keep students engaged, and built-in support tools to keep them on track and successful. **Teachers can customize the**

curriculum, personalize instruction, monitor, grade, and provide meaningful feedback in a variety of formats.

Courses include soft skills and **social-emotional content** wherever possible, to add additional support for students. Our courses don't use artificial intelligence because we believe **teachers provide the most effective feedback** and know their students best. Only the multiple-choice and true-false quizzes, midterms, and final exams are auto-graded.

eDynamic Learning also employs external diversity/sensitivity editors to review our courses to identify potential bias, stereotypes, and inauthenticity to ensure the language and topics addressed are appropriate for all learners.

Comprehensive Features & Benefits
