What is Muzology?

Muzology is a digital learning system that uses music videos to make learning math fast, fun, and effective. Developed by learning specialists, subject matter experts, and hit songwriters, Muzology's math music videos are academically sound and highly engaging. Videos get students algebra-ready by covering foundational math topics that are mapped to standards. After watching music videos, students progress through gamified Challenges, which are in-platform formative assessments that enable students to apply and extend the information presented in videos.

Can you explain Muzology's value as an instructional tool? Can it be used for remote learning?

100%! Muzology has been used successfully to support out-of-school and remote learning for students across the country. The platform is designed to support synchronous and asynchronous instruction. Educators can use the platform real-time with students remotely and/or assign playlists for students to work through at their own pace. Muzology is designed for teacher-directed instruction as well as self-paced and self-directed learning. Teachers (with students in and out of class) also use Muzology to support differentiated instruction.

How do I schedule a demo?

Schedule a Demo at [muzology.com/demo](#). In 15-20 minutes, a dedicated Muzology Specialist can show you around the platform, share best practices and answer any questions you might have (including pricing).

Can students access Muzology at home?

Absolutely, and we hope they do! You can access Muzology, 24-7, from any device with an internet connection.

What grades is Muzology for?

Generally, grades 5-8. Though we do have many high schoolers that effectively use Muzology for accelerated learning recovery, "filling in gaps" and as a refresher. We also see advanced students in lower grades sometimes use the platform. Essentially, any student learning algebra-readiness math skills will likely benefit from the platform!

How many times should students watch a video?

As many times as it takes to learn and apply the information. Just like you know the words to your favorite songs after hearing them repeatedly, Muzology works the same way. The more that students watch Muzology music videos, the easier it becomes to recall the information. When students watch a new music video, we recommend at least three views/listens. Imagine taking a math test and hearing a Muzology song in your head to help you solve the problem. Pretty cool stuff!

How much does it cost? Are you offering any special pricing this year?

Monthly and annual pricing for individual parents can be found on the Parents page. For teachers, schools, and districts, please contact us, as pricing is tiered based on the number of students: [pricing@muzology.com](#). Please contact us for information regarding special COVID-relief pricing if your household, school, or district has been adversely affected.

Does Muzology offer professional development?

We certainly do. Although the Muzology platform is super intuitive to use, we love to provide PD for teachers to cover platform features, best practices, and implementation tips. Currently, all PD is offered via video conference and takes about 90 minutes. For more information, please contact: [info@muzology.com](#).

How do I cancel my subscription?

We're always sad to see folks go, but if for any reason you need to cancel, please email us at [info@muzology.com](#).

How do I contact Muzology?

You can email us anytime at [info@muzology.com](#).

Muzology has not just given me confidence in my ability to do math. It's given me confidence in my ability to do anything.

★★★★★
Middle School Student

“ It's one of the best resources that I've got, and I've been teaching for 25 years. It's reminded me of what I grew up on: Schoolhouse Rock but on steroids!

★★★★★
SHIRLEY F.
Math Department Chair (Little Rock, AR)

“ You're still learning, and you're having fun at the same time.
