## Using BlocksCAD for Distance Learning

At BlocksCAD, we're concerned about the impact the COVID-19 coronavirus is having on students and educators. Therefore, as a leader in math and coding education in schools, we'd like to do our part to help. Complete the form below or email [info@blockscad3d.com](mailto:info@blockscad3d.com) so that we can help you get set up to use BlocksCAD this year.

**If you are a parent hoping to use BlocksCAD at home with your kids, please click here (<https://www.blockscad3d.com/parents>).**

## What is BlocksCAD?

BlocksCAD builds math and computer science skills by using a specialized 3D CAD (computer-aided drafting) software. A block-based coding platform allows students to create and manipulate 3D objects while using geometry and computational thinking skills. BlocksCAD fully supports teachers of any coding ability by providing a comprehensive curriculum with detailed lessons that are standard-aligned.

BlocksCAD is perfect to work on remotely as it integrates with Google Classroom and works on any device. Sign up below so we can reach out to you about your needs.
