

Intervention management

Prolific's effective delivery of research-supported interventions matches student need. Users can also quickly access a bank of all interventions used in their district — complete with standardized descriptions, uploaded implementation protocols, and links to supporting research. Prolific tracks participation and dosage for program evaluation, and gives users feedback about what is used most.

Prolific increases implementation consistency by ensuring all teachers have easy access to the information they need to deliver high-quality intervention to students.

Prolific's research-supported intervention bank

- Accesses a bank of all interventions used in your district — standardized descriptions, uploaded implementation protocols, and links to supporting research
- Matches student need with a curated bank of research-supported interventions and tracks progress
- Promotes systematic implementation, offers teachers a reliable toolkit, and enables high-quality program evaluation
- Generates information in graph form for parents and teachers
- Tracks participation and outcomes for program evaluation
- Gives users feedback about what is used most
