Specialized Tutoring for Students with Learning Differences

What makes us different.

Each student is unique. Whether they're struggling with dyslexia, ADHD, or learning disabilities, they have unique needs and learn in unique ways. They deserve a personalized approach from someone who knows where to focus and how to inspire a sense of confidence.

That's where we come in. Using data from adaptive assessments to determine student strengths and areas of growth, we develop a customized solution for each student that delivers improved outcomes tied to their Individualized Education Program (IEP) or a 504 plan.

"Dedicated" only scratches the surface.

Helping students overcome their learning challenges isn't easy. We believe learning differently shouldn't be a barrier to learning, which is why we work so hard to create a supportive learning environment by helping students connect with experienced instructors.

Fortunately, schools don't have to do it alone. From day one, each district has access to a committed Education Director who is ready to answer any questions, along with a team of expert tutors with special qualifications to support students with learning differences.

“

Varsity Tutors is truly offering a unique opportunity to students with special needs around the country to receive individualized/group instruction at a pace that allows for them to achieve greater understanding and perhaps, more importantly, self-confidence.

– Marc Deppe, Tutor

Learning Differences

Varsity Tutors has over 10,000 tutors with special qualifications in special education, ESL/ELL, Dyslexia, ADHD, Autism, and Gifted Programs

We believe the right expert with the right tools can be the difference between making real progress. Every expert tutor undergoes a thoughtful, and exhaustive, vetting process. Then we select the best, most empathetic tutors to help students with learning differences. The result? We're so confident you'll be completely satisfied that we offer a 100% tutor satisfaction guarantee.

What we look for in an expert:

- Experience implementing learning plans for students with learning differences
- Solid understanding of both IEPs and 504 plans
- Exceptional teaching and communication skills
- Adept at identifying why students struggle
- Exceptional skills building relationships with students
- Models executive functioning skills and a positive mindset
- Provides differentiated instruction in content, learning strategies, study strategies, and executive functioning skills
- Prior teaching and mentoring experience

Learn what it takes to excel.

The expert tutors develop personalized learning plan that are unique to each student regardless of their challenges. And by taking the time to understand how each student learns, they'll be able to apply the right strategies in the right way.

Support Across a School or District

Individualized support for students across a school or district can be a challenge. Varsity Tutors makes it easier with 1-on-1 and small group tutoring that allows for students of similar age and levels to learn side-by-side, regardless of their location. Students are re-assessed by an expert tutor to ensure they are in the right group for their knowledge and skills. Now, districts can work across campus boundaries to support all their students with IEPs and 504 plans in one place.

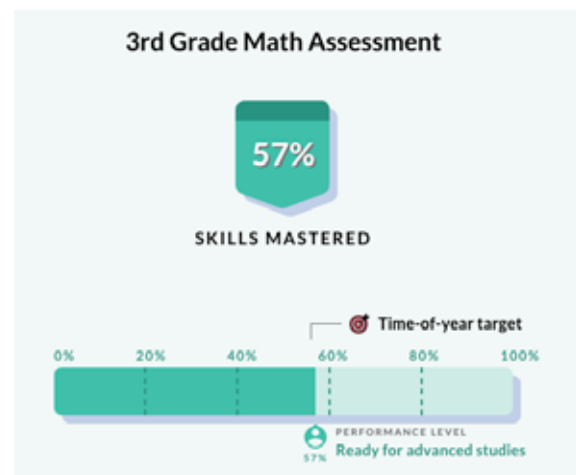

Included Resources for Different Learning Styles

Tools for added confidence.

Technology should make learning more accessible, not more frustrating—especially for students with learning differences. With the Live Learning Platform, we've focused on innovating to enable. Helping your student get the most from their experience means having access to the right learning tools. That's why we provide industry-leading resources at no additional cost.

Mobile App

Not only does our mobile app put our learning tools in student's hands, it opens up new ways to interact when paired with the Live Learning Platform. For students who have trouble with keyboards, they can use their device touchscreen to write with their fingers and draw shapes more naturally. Plus, they can use the device camera to upload homework straight to the Platform.

Flashcards and Practice Problems

When a student “gets it,” their confidence skyrockets. To help them along the way, we offer an array of tools in our Learning Lab including practice questions and flashcards for a number of key subjects—expertly written and available anytime.

Adaptive Assessment

This revolutionary tool uses advanced artificial intelligence (AI) to create truly personalized learning plans. Basically, it measures student proficiency across skills and knowledge outlined in state standards, identifies strengths and weaknesses, and recommends the best way to increase their understanding.

Why Varsity Tutors?

All students with learning differences deserve a personalized approach from an educator who knows where to focus and knows how to work with IEPs and 504 plans.
