Make Data-Driven Decisions

- Monitor usage and performance over time.
- Use recommended objective-aligned activities, designed by our curriculum experts to help spark teaching ideas.
- Access information that is up to date, easy to understand, and actionable for meeting standards.

Save Time

- View the lesson objectives that students need help with.
- Spend less time on math assessment.
- Identify prior knowledge and what was recently learned to help develop math skills.
- Group students for small group instruction with automatic suggestions based on how they're learning and what they need to learn next.
- Access essential math teaching tools for success, including related offline activities, alignment to math standards, and details about students' usage and progress.
- Flexible classroom set-up options make rostering quick and easy.
- Access standards correlations on the Dashboard.
- View points of connection to commonly used core programs.

Access Multi-language Support

- Set the app to Spanish to support primary language and dual-language immersion classrooms.
