

Teach the Language of Science

Science+Language™ 6-8 Accelerates Concept Mastery

Science+Language 6-8 helps students acquire complex science concepts by providing language scaffolds, developing scientific communication skills, and by delivering tools for investigating phenomena, explaining reasoning, and writing & refining claims and conclusions. It's easy to implement and has been shown by NSF-sponsored research to be impactful with a dosage of as little as 30 minutes per week.

Science reading passages in Speak Agent, such as this *Read Along*, serve as a focal point for classroom discourse. All student responses are captured in the digital portfolio.

Modules and Standards

Science+Language 6-8 consists of easy-to-implement modules that can be aligned to fit your scope, sequence, and pacing.

Program Support

Speak Agent supports ESL, Title I, dual-language, and multi-language science programs. It is optimized for English Learners and other marginalized learners. It uses [research-based, multimodal instructional strategies](#) to help students make connections to background knowledge, master complex concepts, and acquire the language needed for self-expression. Students improve their ability to communicate both verbally and in writing with precision and confidence.

NATIONAL SCIENCE FOUNDATION STUDY

How did Manor ISD supercharge science concept mastery **by 210%**?
