

(The Future of Math)^m

Equitable Math + Engaging Technology = Empowered Students

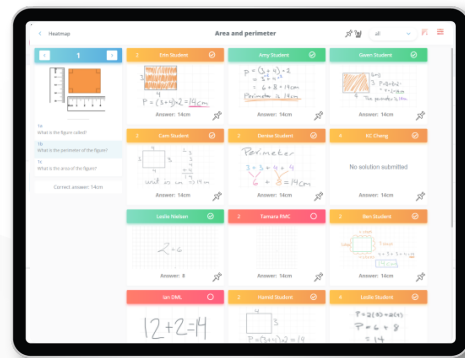

The only math platform combining the power of **handwriting** with the advantages of **digitization** - empowering ALL students to see themselves as doers of math because they can show ALL their work - not just the final answer!

Math talks

With real-time access to ALL student solutions, teachers can provide the right support at the right time ...

... By anonymizing solutions, students are invited to participate in math conversations, creating room for everyone to engage and build **mathematical confidence. (Wahoo!)**

Formative assessment

It's easy to design lessons and formative assessments from our library of standards-aligned tasks for K-12 math

Students get **immediate feedback** and teachers are supported in the moment and over time

**Immediate
feedback**

**Insights on
skills & gaps**

**Recommended
actions**

As a digital math tool should work

Students learn best when showing their work

Educators can refocus their time with automatic grading

Cross-platform compatibility

24/7 support with answer within 3 min

120+ languages and text-to-speech

Customized assignments with a few clicks - as simple as shopping online

When students show their work, it accelerates their learning and enables me to understand students' thinking. Magma's platform is a gamechanger for how I will do math instruction going forward.
