

Student Performance

FLVS makes a difference in the lives of thousands of students every day through one-on-one instruction, engaging course content, and real-world technology. We work hard to successfully guide students on their personalized learning path. Our awards, recognitions, and student outcomes show the value of online learning in providing increased opportunities that set students up for success across Florida and around the world.

In Florida, benchmarks for student mastery of learning for a given course are measured through state-created End-of-Course (EOC) exams for key subject areas. Based on the Spring 2018 EOC assessments, FLVS students outperformed state averages on the Algebra 1, Biology 1, Civics, Geometry, and U.S. History EOC Assessments.

Based on May 2018 Advanced Placement (AP) Exam results, FLVS students:

- Exceeded the state of Florida in overall averages by 11.3 percent in comparing the 15 AP courses offered by FLVS and were above the state qualifying AP averages in 11 of the 15 courses.
- FLVS students performed above the national overall average by 4.1 percent in comparing the 15 AP courses offered by FLVS and were above the national qualifying AP averages in 7 of the 15 courses.
