Code Combat

Engage students.
Empower teachers. Inspire creation.

GRADES 4-12 | WEB BASED | GOOGLE LOGIN

CodeCombat.com

CodeCombat is a comprehensive, standards-aligned computer science solution that's accessible to all educators, regardless of technology experience.

Built-in Differentiation:
Meet students at the optimum learning level with adaptive practice levels

Real-world Relevancy:
Students type real Python and JavaScript and create games and webpages in 5 project-based courses

Flexible Curriculum:
From middle school to your AP class, CodeCombat can work for your use case

Insights Dashboard:
Educators can keep track of student performance and identify who needs extra support

CodeCombat uses a real game-based learning model so that students get immediate feedback on their code, build grit, and fall in love with Computer Science.

"Name any program online, I've tried it. None of them match up to CodeCombat. Any teacher who wants their students to learn how to code… start here!"

Scott Baily, Teacher
Bobby Duke Middle School
