ZEARN

All children can love learning math

Zearn is a nonprofit curriculum publisher and software developer on a mission to ensure all children love learning math. We work with teachers nationwide to build inclusive classroom communities where all students have equal opportunities to belong and deeply learn the math content of their grade. At the core of our mission is a belief that an understanding and love of mathematics is critical to helping all children realize their potential and to creating a generation of engaged learners who can change the world.

In pursuit of our mission, Zearn publishes **Zearn Math**. Zearn Math provides a uniquely integrated approach to math teaching and learning, connecting a rigorous curriculum with a cohesive classroom system, professional development based on pedagogical content knowledge, and actionable reports on student learning. This approach recognizes that top-rated instructional materials are most

impactful when they are deeply integrated into classroom systems and teacher learning communities. With Zearn Math, educators are supported each day with the material, knowledge, and data they need to create engaging learning environments and differentiate instruction to reach all students.

We're grateful to the thousands of educators who have partnered with us and supported our growth and evolution since the launch of Zearn Math. In 2017, Zearn Math was "green-lighted" by **EdReports**, becoming the only top-rated elementary school math curriculum with both teacher-led small group lessons and personalized software-based lessons for every day of instruction. Today, Zearn Math is used by over 2,500,000 students in classrooms across the country. **Research** indicates learning with Zearn Math can increase student engagement with math, improve math learning mindsets, and drive gains in academic achievement.

Our journey to ensure all children love learning math has just begun. Since Zearn was founded in 2012, our mission has guided every step of our work, and it continues to push us to learn and improve in order to better serve all students and teachers.
