# Inspiration to help you inspire.

Apple products can be powerful teaching tools, especially when educators get the support and know-how to fully unlock their capabilities. So we've developed curricula that make it easier to bring coding and core creative skills to every subject. We've also designed programs to help teachers learn from each other, professional learning resources to build skills and confidence with iPad and Mac, and initiatives to recognize pioneers in education. All to empower them to be the best teachers they can be.

Everyone Can Create

# A curriculum that brings creative expression to every subject.

As a teacher, you know that creativity is an essential skill. We created a new collection of project guides that helps teach students to develop and communicate ideas through drawing, photography, music, and video. And it gives you fun and meaningful ways to ignite student creativity by bringing these skills into any lesson, topic or assignment.

## Teaching Code

# An immersive program to help you teach the language of innovation.

Coding is essential to help students thrive in a future driven by technology. We created the comprehensive Everyone Can Code curriculum with lessons on iPad and Mac, teacher guides, and apps to make it easy to teach coding in your classroom. And by earning App Development with Swift Certification, aspiring app developers can demonstrate their readiness to take the next step in learning.

# Teach in ways you've always imagined.

You inspire the next generation of leaders. You make complex ideas easy to understand. And you're always looking for new ways to engage your students. So we've gathered a series of tips, stories, and other helpful materials to keep you inspired.

[Discover tips, stories, and lessons >](#)

# Great teachers never stop learning. And we fully support that.

We've created a suite of comprehensive learning programs exclusively for educators. They're designed to take you from foundational skills to integrating iPad and Mac into everyday lessons to the newest techniques in classroom innovation.

## Apple Teacher

Apple Teacher is a free, self-paced professional learning program. Build skills on iPad and Mac that directly apply to activities with your students, and earn recognition for what you learn.

“I am constantly looking to grow in my profession. Apple Teacher has opened up new ways to inspire and engage my students.”

Mr. Cramer  
Lombardi School Teacher

## Helping teachers learn by example.

You're always looking for new ways to engage your students. And the best ideas usually come from fellow educators. That's why we've gathered advice and insights from those who have successfully integrated Apple products in their classrooms — so you can do the same in yours.

Lombardi School Principal

Tools for Teaching

**Apps that help you put the power of technology to work. In and out of class.**

We've developed tools to make it easy for you to guide how your students use devices and apps in the classroom, and to provide valuable insight into each

student's progress. So you can focus on what's most important: teaching.
