A comprehensive instructional system for 3rd-5th grade math

Adaptive, personalized online curriculum

A dynamic, interactive curriculum engages students at all levels with appropriate support and authentic challenge.

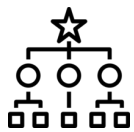

Continuous, automated assessment of student progress informs instruction and personalizes the learning pathway for each student.

Context-rich instructional model

Our adaptive, interactive curriculum provides instant feedback with embedded intervention and enrichment lessons to support and challenge students at every level.

Integrated SDAIE and GLAD strategies for ELs provide contextual, connected instruction to benefit ALL students.

Measurable, standard aligned student growth

Aligned with Common Core State Standards, Levered promotes student learning and a deep understanding of underlying concepts mapped to specific standards.

Levered continuously assesses and personalizes, while monitoring each student's path towards proficiency.

Integrated pencil & paper group challenges

High level collaboration helps to develop higher order thinking, mathematical language and teamwork.

Teachers gain the opportunity for deeper assessment and time to focus on reasoning and strategy.

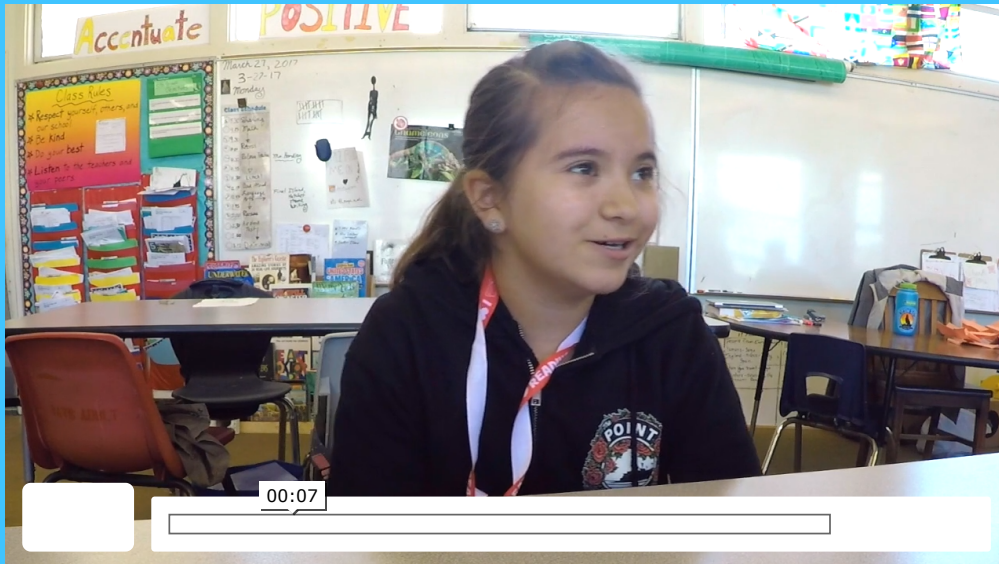

Powerful & intuitive teacher dashboard

Student data is integrated effortlessly and instantly, freeing the teacher to focus on the most critical aspects of instruction.

Easy access to student data supports real-time instructional decisions, with up-to-the-minute student monitoring and notifications to facilitate classroom management.

Smarter tools, stronger engagement.

Reach every student with a standards-aligned math curriculum built on an integrated, intelligent instructional platform.

"Out of any other programs that they've [teachers] used, this is the one program they say is making an impact—not only on the students because the students love the program, they're engaged, and they're excited to use the program, but the teachers see so much value."

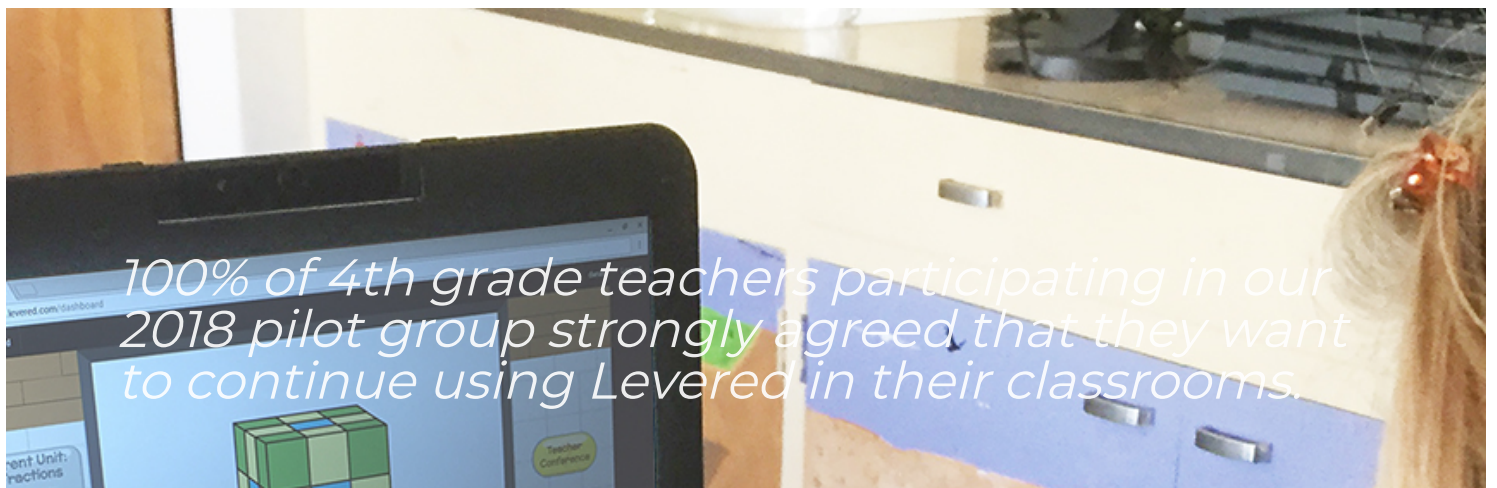

-Lalaine Perez, Principal, Salt Creek Elementary

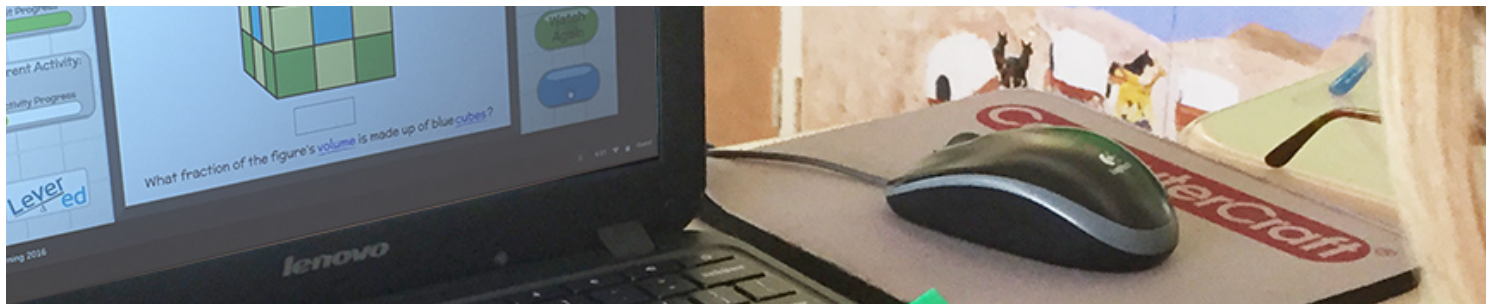

Sample Lessons Try The Lessons

Standards-aligned lessons from Levered's 4th grade curriculum

The image displays three laptops on a light blue background. The left laptop shows a lesson about fractions using a dog and a sandwich. The middle laptop shows a 'Lesson 2 Vocabulary' page with terms like fraction, denominator, numerator, and equivalent. The right laptop shows a lesson about measurement using a ruler and a screw.

What Levered does

- Continuously assesses and personalizes
- Actively monitors students during class
- Delivers a full, dynamic curriculum in one easy to use package

Allowing teachers to

- Facilitate high level group work and discussion
- Support students who need extra help
- Challenge students who are ready for enrichment
