

# Cloud9World™ Curriculum

## An Integrated Social-Emotional and Literacy-Based Solution

### Cloud9World™ Curriculum

Cloud9World™ uses literacy to teach social-emotional learning competencies through an understanding of self and others. The understanding and development of one's character provides children with tangible tools and behaviors that empower them to develop socially, emotionally, and academically.

Professional Development

Hands-On Learning

# See how it works

## KIWI Program – Gr. PreK-1

Learning self-regulation skills provides a strong foundation for mental health and social-emotional growth. With this online curriculum that delivers SEL content via a literacy platform, children learn to understand, name, and tame the eight basic emotions with the lovable Kiwi character through interactive books, videos, games, and plush toy Kiwis.

Teachers make learning about emotions and self-regulation understandable and attainable for young children and their parents with a flexible curriculum of play-based, pre-literacy SEL activities and assessments. Visual cues that support the co-regulation process include a calm corner, posters, sequencing cards, a large puzzle mat, and parent-support products.

Building social, emotional and literacy skills, the program uses similar resources or components for each emotion.

## Elementary School Program – Gr. K-5

This program focuses specifically on building social-emotional learning through character strengths with digital and printable tools for completely customizable, school-wide implementation. The program delivers content through a literacy lens, so teachers are getting double benefit.

### Elementary Program:

Students move through the continuum as they move through different strengths, from kindergarten through 5th grade.

- **Elementary Core** – Focuses on building the core character of the whole child via self regulation and self management
- **21st Century** – Provides students with the skills to success at school and at work
- **Building Great Citizens** – Prepares positive community contributors through character strengths; program can be used at all tiers of MTSS to provide a comprehensive SEL curriculum for all students

**NE40053** Priced Per School

## Middle School Program – Gr. 6-8

Middle school students take a different approach to social-emotional learning. The Middle School Core approaches social-emotional skills through a decision-making lens. Students investigate 30 character strengths to determine what each is and isn't and then weigh the advantages/disadvantages of adopting the strength and corresponding behaviors. Digital books also include a variety of school and work-based scenarios in which the character strength can be applied. Students are encouraged to work together in small groups to complete the scenario through responsible decision-making. Lesson plans support increased rigor with a menu of student activities that include problem-solving, research, and decision-making. Throughout the lesson, students have an opportunity to practice creating positive relationships with their peers.
