

Educational Publications

Our work address the full spectrum of topics and issues associated with STEM education, and often results in insightful and inspiring publications.

From books to peer-reviewed journals, op-ed pieces, and conference presentations, our publications allow you to explore the wide range of research TERC staff have undertaken for more than 55 years. These materials answer challenging questions, uncover important findings, and delve deeper into creating a level playing field for life-long learners. Every day we strive to inform and engage our audience with the best practices in education for all learners, as well as professional development, and evaluation. We're moving the world forward with STEM education, and our publications can help you join the movement.
