**Teacher Name:** Janee Rivard-Johnson

**School:** Kenny Elementary School,  
Minneapolis, MN

**Grade:** 5th Grade Math/Science

## How I Use It

I use Woot Math to support the rational numbers content in my classroom. Woot math has so many different books/levels and concepts, I can individually place my students at their independent level. The support of videos is essential for kids as a refresher or review. However, my favorite part is the teacher dash board. The snapshot of each students thinking is helpful to share with both students and parents regarding students misconceptions around rationale numbers.

Woot Math Is Where It Is At!

”

## My Take

Woot math is the best online math support program I have used in the last 5 years. It supports teaching conceptual understanding of rational numbers with very little language. It is adaptable for individual students needs. Students can work at their own pace. The teacher dashboard gives me the data and information I need at my fingertips.

**My Rating:** ★★★★★
